

Mémoire Pays Francophones

Le français est la langue officielle de nombreux pays indépendants, ainsi que de territoires divers et de plusieurs institutions. En plus de la France et des régions francophones limitrophes (notamment en Belgique romane et en Suisse romande), d'où la langue est originaire, il s'agit pour la plupart d'anciennes colonies comme le Sénégal ou d'anciens protectorats français et belges.

Le statut du français comme langue officielle d'un pays n'est pas nécessairement en rapport avec le nombre de locuteurs de ce pays. C'est particulièrement vrai pour beaucoup de pays africains.
